

Bedrock® SMxx acoustic measuring instruments

An acoustic measuring device for every application and budget

The Bedrock SMxx acoustic measuring instruments (SM30, SM50, SM90) share the same basic hardware platform and have the same intuitive user interface, but are each optimized for a different set of demands and applications. The developers of the SMxx product line made sure that these instruments are extremely easy to use - yet without accepting any compromises when it comes to accuracy and reliability.

About Bedrock

Bedrock audio is an independent brand of acoustic measuring instruments that is developed and manufactured by Embedded Acoustics in the Netherlands. Embedded Acoustics is a young company (founded in 2010), built on the extensive experience of the industry veterans and researchers counted among its founders and developers.

Why choose Bedrock?

The design philosophy on which the Bedrock SMxx devices are based is simple. Our products must meet the following standards:

1. No compromises in terms of reliability and accuracy.
2. The ease of use of a smartphone.

Our pricing is transparent and highly competitive. Firmware updates are free and often add additional modules and functions to the device. You are not charged separately for individual modules; if a module is supported for a specific device model, then it is included in its purchase price.

Which model to choose?

Please consult the comparison table on the reverse side of this flyer. The Bedrock SM30 is the basic model, which comes standard with a variety of measuring modules

(class 2 SLM, RTA, FFT, RT60, scope, ...). The SM50 includes all the functions of the SM30, plus modules for speech intelligibility measurements (STIPA). The SM90 has all the features of the SM50, but complies with the strictest requirements for sound level measurements (class 1) according to IEC-61672.

Where to buy?

Please refer to our website for up-to-date list of distributors, or contact us directly if you cannot find a reseller in your region:

Bedrock® SMxx product line

SMxx comparison chart

Hardware	SM30	SM50	SM90
Full-colour resistive touch display	•	•	•
Class 2 electret microphone & preamp (1/4")	•	•	
Class 1 microphone (1/2" UNC capsule)			•
Storage for measurement data and audio	4 GB	4 GB	8GB
Rechargeable internal 2400 mAh battery	•	•	•
Internal real-time clock and calendar	•	•	•
High-speed transfer of measurement data and recorded audio via USB2.0	•	•	•
Including accessories (charger, cables, carrying case, windscreen, carrying cord, flashdrive with manual and test signals)	•	•	•
Modules / functions	SM30	SM50	SM90
Sound Level Meter (SLM), IEC-61672, ANSI S1.4	class 2 / type 2	class 2 / type 2	class 1 / type 1
Real Time Analyzer (RTA) 1/3 and 1/1 octave, IEC-61260 class 0	•	•	•
Fast Fourier Transform (FFT) frequency analysis	•	•	•
Reverberation Time (RT60), ISO-3382	•	•	•
Long-term Leq logging/monitoring (e.g. LAeq15min)	•	•	•
Digital storage oscilloscope (<=20 KHz)	•	•	•
Automatic level calibration procedure	•	•	•
Calibrated recording of audio on internal memory	•	•	•
Real-time calibrated USB audio device mode	•	•	•
Remote control from PC via USB (either through serial commands or cloning of the display)	•	•	•
Advanced intelligibility measurements (STIPA Pro), IEC-6128-16 rev. 4.		•	•
Basic intelligibility measurements (Quick STIPA), IEC-6128-16 rev. 4.		•	•
Acoustic specifications	SM30	SM50	SM90
Linear range (with supplied microphone)	30-124dB	30-124dB	22-146dB
Linear range, electric input: 22 - 125 dB	22-125dB	22-125dB	22 -125dB
Other	SM30	SM50	SM90
Colors	Blue and black	Gray and black	Red and black
Warranty (worldwide pick-up & return)	24 months	24 months	24 months
Price excl. VAT (EUR).	contact us	contact us	contact us

Embedded Acoustics is committed to sparking innovation in the fields of acoustics, speech and hearing. Our mission is to translate scientific knowledge and high-tech engineering into working, real life products and services. We're not just talk - get in touch and find out what we are all about: expertise, experience and a practical mindset.

The above comparison table applies to the SM30, SM50 and SM90 with firmware version 1.8 installed (released October 2016). Note that specifications and pricing are subject to change. New modules and functions are regularly released through firmware updates.
