

Noise Nuisance Recorder

Trojan²

Noise Nuisance Recorder

LOCAL
AUTHORITIES

HOUSING
ASSOCIATIONS

The Trojan² noise nuisance recorder was designed in conjunction with local authorities, environmental health officers and housing associations to allow you to measure, monitor and record noise nuisance quickly, easily and effectively.

Our straightforward yet powerful noise monitoring equipment will provide you with the accurate and objective noise data you need to make the right decision to resolve noise complaints quickly and effectively.

“Having the Trojan as part of our team is like having another member of staff who doesn’t mind working evenings and weekends.”

Ross Jarvis, Senior Technical Officer, Reading Borough Council, UK

Key features:

- Designed specifically for noise nuisance measurements
- Quick, simply and easy to set up
- Designed, manufactured and supported in the UK
- High-quality audio recording
- Lightweight and discreet
- Secure and tamper-proof
- Industry-leading 15-year warranty

Specifications in brief

Memory	4GB as standard but can be expanded with a 32GB option
Instrument	Class 1 or Class 2 available
RMS Range	120dB dynamic range in a single span
Time weightings	Fast, Slow & Impulse measured simultaneously
Audit Store	Measurement verification data stored in secure memory

Why choose Cirrus Research?

- 1) Providing sound solutions since 1970
- 2) UK-based in-house team of experts on-hand to offer help, support, guidance and training
- 3) Rental options available
- 4) Bespoke turn-key solutions available
- 5) We supply quality equipment that is trusted by customers all around the world

Simple, effective and reliable equipment for the measurement and investigation of noise nuisance and environmental noise.

How can the Trojan help you?

The Trojan will help you monitor, manage and analyse noise nuisance complaints quickly, easily and with minimal effort. Once you've decided to deploy the Trojan, it's a simple process to set the equipment up and to start getting reliable, actionable data. By making the system quick and simple to deploy, the amount of time you need to spend on-site is dramatically reduced. All you need to do is connect the power, calibrate the instrument, lock the case and you're ready to go.

Training and support

- UK-based calibration and training
- Support available direct from the manufacturer
- 15-year no-quibble warranty, including accidental damage cover
- Access to a named tech support engineer
- Noise nuisance training and workshops available across the UK
- On-site training also available, including refresher courses and bespoke packages

Licence-free software, that's complimentary*

The NoiseAid platform helps you gather information so you can legitimise claims before deploying the Trojan. The platform is a digital noise diary for users to quickly report issues. It's simple to operate with large, clear buttons and icons, and easy to set up with a unique, secure PIN for each user. It's free for all Trojan users, so there's never any ongoing subscription costs.

To ensure you get the most out of your investment, all our instruments are supplied with our licence-free data download, analysis and reporting software, NoiseTools. NoiseTools allows you to review measurement data and create easy-to-understand reports that can be used to influence decisions when it comes to controlling/reducing noise levels.
